2/1/2022 - 2/28/2022 Kathy Basile, RN,MS,MSN	PHN continued to do daily surveillance and investigation of the CDRSS system for communicable diseases. CDRSS also surveilled for Lead Cases; no lead cases reported for February.
2/1/2022 - 2/28/2022 Kathy Basile, RN,MS,MSN	PHN answered calls from Harding Township residents for COVID and other health related questions.
2/1/2022 - 2/28/2022 Kathy Basile, RN,MS,MSN	PHN continued to work with Harding Township School nurse on CoVID outbreak in school, providing guidance, educational support, investigation, and reporting of cases through CDRSS system.

H. Public Health Nursing Supervision

Date/Employee(s)	Activity
2/1/2022 - 2/28/2022 Cindie Bella, RN	<p>The Public Health Nurse Supervisor (PHNS) maintains ongoing contact with the other MCDPH Public Health Nurses (PHNs) regarding current and closed COVID-19 and Communicable Disease Reporting Surveillance System (CDRSS) cases. The Welligent Childhood Lead Poisoning System are also discussed with the PHNs. No cases reported.</p> <p>No animal bites reported.</p>

Section III. HEALTH EDUCATION & PROMOTION SERVICES

Date/Employee(s)	Activity
2/17/2022 Kristina Favo	The Health Education Field Representative distributed Harding Township's COVID-19 vaccination clinic flyer.
2/10/22 Imge Uludogan	The Health Education Field Representative attended the Overdose Fatality Review Team subcommittee meetings for Anti-Stigma, Harm Reduction, and the Resource Guide.

Section IV. ENVIRONMENTAL HEALTH ACTIVITIES

A. Individual Sewage Disposal Systems Plan Reviews

Date/Employee(s)	Address	Description/Outcome
2/1/2022 Shelby Meyers	7 Tall Pines Road B: 26.03 L: 5.02	The REHS reviewed an application and plans for interior renovations.
2/1/2022- 2/2/2022 Jessica Freer	139 Blue Mill Road B: 6 L: 8	The REHS reviewed an application and plans for interior renovations.
2/1/2022 Shelby Meyers	1 Woodland Road B: 56 L: 12.01	The REHS reviewed an application for repair of a conveyance line. The REHS issued permit for repair.
2/1/2022 Jessica Freer Shelby Meyers	1098 Mount Kemble Road B: 46.01 L: 8	The REHSs reviewed an application for renovations to an existing business. The REHS issued health department approval to the Construction Official.
2/4/2022 2/7/2022 2/14/2022 Jessica Freer	49 Meyersville Road B: 55 L: 4 & 5	The REHS reviewed an application and plans for a septic alteration. The REHS provided comments to the engineer. The REHS issued a GP-24 letter for system.
2/25/2022 Jessica Freer	118 Pleasantville Road B: 54 L: 13	The REHS reviewed as-built, engineer's certification, and suitable fill certification. The REHS issued a Certificate of Compliance

B. Individual Sewage Disposal Systems Plan Inspections

Date/Employee(s)	Address	Description/Outcome
N/A	N/A	N/A

C. Individual Water Supply Plan Reviews

Date/Employee(s)	Address	Description/Outcome
N/A	N/A	N/A

D. Individual Water Supply Inspections

Date/Employee(s)	Address	Description/Outcome
N/A	N/A	N/A

E. Retail Food Establishment Inspections

Date of Inspection & Inspector	Name & Address	Risk Category	Rating
N/A	N/A	<input type="checkbox"/> Risk 1 <input type="checkbox"/> Risk 2 <input checked="" type="checkbox"/> Risk 3 <input type="checkbox"/> Risk 4 <input type="checkbox"/> Mobile	<input checked="" type="checkbox"/> Satisfactory <input type="checkbox"/> Conditionally Sat. <input type="checkbox"/> Unsatisfactory <input type="checkbox"/> No Rating *

F. Retail Food Establishment Re-Inspections

Date of Inspection & Inspector	Name & Address	Risk Category	Rating
N/A	N/A	<input type="checkbox"/> Risk 1 <input type="checkbox"/> Risk 2 <input type="checkbox"/> Risk 3 <input type="checkbox"/> Risk 4 <input type="checkbox"/> Mobile	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Conditionally Sat. <input type="checkbox"/> Unsatisfactory <input type="checkbox"/> No Rating *

G. Retail Food Establishment Visits/Conferences with Owner/Staff

Date of Inspection & Inspector	Name & Address	Reason for Visit/Conference
N/A	N/A	N/A

H. Temporary Food Establishment Inspections

Date of Inspection & Inspector	Name & Address	Risk Category	Rating
N/A	N/A	<input type="checkbox"/> Risk 1 <input type="checkbox"/> Risk 2 <input type="checkbox"/> Risk 3 <input type="checkbox"/> Risk 4 <input type="checkbox"/> Mobile	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Conditionally Sat. <input type="checkbox"/> Unsatisfactory <input type="checkbox"/> No Rating *

I. Retail Food Establishment Floor Plan Reviews

Date of Review & Reviewer	Name & Address of Establishment	Summary of Review
2/3/2022 Shelby Meyers	Classic Café 1200 Mt. Kemble Ave.	The REHS reviewed the floor plan and menu of the establishment. The REHS reached out for additional information and to set-up a walkthrough.

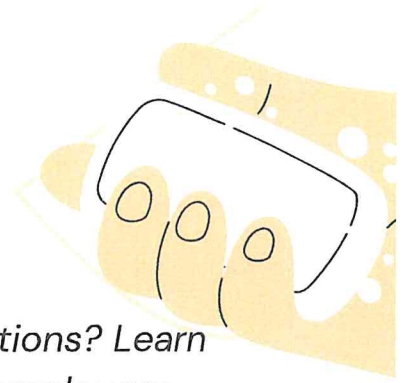

J. Retail Food Establishment Complaint Investigations

Date of Review & Inspector	Name & Address of Establishment	Summary of Complaint
N/A	N/A	N/A

K. Recreational Bathing Initial & Preoperational Inspections

Date of Inspection & Inspector	Name & Address	Rating
N/A	N/A	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Conditionally Sat. <input type="checkbox"/> Unsatisfactory <input type="checkbox"/> No Rating *

Get a Handle on Food Safety

Is your food establishment up to date on food safety regulations? Learn from your local health department on ways to keep your employees and customers safe. Hear about updates to food safety, new regulations on plastic, paper and foam bans, along with food waste recycling. A short written quiz will be given at the end of the course. Upon completion of the course and passing the short quiz, you will receive a Certificate of Completion.

April 26th, 2022

9am-11am

**Denville Township Municipal Building
1 St Marys Pl, Denville, NJ 07834**

September 20th, 2022

1-3pm

**Hanover Municipal Building
Main Meeting Room
1000 Route 10, Whippany, NJ, 07981**

Spanish: June 4th, 2022

9am-11am

**Morris Plains Community Center
51 Jim Fear Dr, Morris Plains, NJ 07950**

The course is free of charge.

Registration is required.

Please contact the Morris County Division of Public Health at 973-631-5484 to register.

For specific questions please contact your local health department and request to speak with the Registered Environmental Health Specialist

INFLUENZA FORM

1. Flu Activity Report Ending February 26, 2022

Highlights

- **Influenza activity level is low statewide**
- **Emergency Department visits associated with influenza-like illness are higher than last week and higher than this same week last year**
- **Outpatient provider visits associated with influenza-like illness are higher than last week and higher than this same week last year**
- **There have been no influenza-associated confirmed pediatric deaths reported this season**
- **There have been 12 outbreaks reported from Long-term Care Facilities this season**
- **Positive results continue to be reported; Influenza A (subtyping not performed) is at 75.49%, followed by A(H3N2) (23.07%), B (1.29%), and A(H1N1)pdm09 (0.15%)**

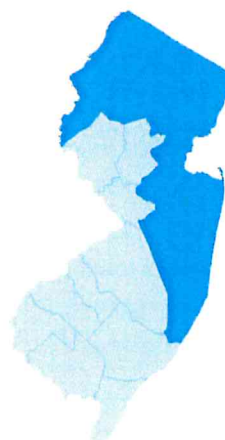

Influenza Activity Level Comparison

1. Current Influenza Activity Level

This report contains surveillance information for influenza and other viral respiratory illnesses reported to the New Jersey Department of Health (NJDOH); Communicable Disease Service. As per regulation, influenza is a laboratory reportable condition but it is not possible to count every case that occurs since some individuals will not seek medical care or may never get tested. Surveillance is conducted year round and this report is published from October to May. The Morbidity and Mortality Weekly Report (MMWR) week is the year used by the Centers for Disease Control and Prevention (CDC) for disease reporting and can be found at https://www.nj.gov/health/cd/documents/flu/MMWR_weeks.pdf. Activity Levels are defined in the table on page 7 of this report. Counts displayed below are the cumulative totals reported for the season beginning with MMWR week 40, week ending October 9, 2021.

State Activity Level	
LOW	
Regional Data	
Northwest Morris, Passaic, Sussex, Warren	MODERATE
Northeast Bergen, Essex, Hudson	MODERATE
Central West Hunterdon, Mercer, Somerset	LOW
Central East Middlesex, Monmouth, Ocean, Union	MODERATE
Southwest Burlington, Camden, Gloucester, Salem	LOW
Southeast Atlantic, Cape May, Cumberland	LOW

9,563

Cases reported (PCR & Rapid)

12

Outbreaks (Long Term Care)

0

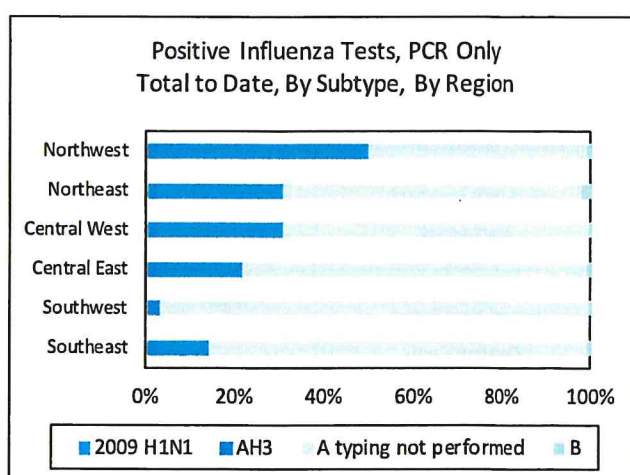

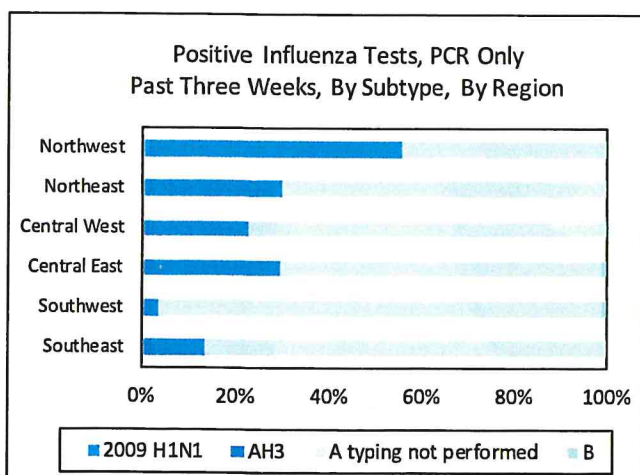

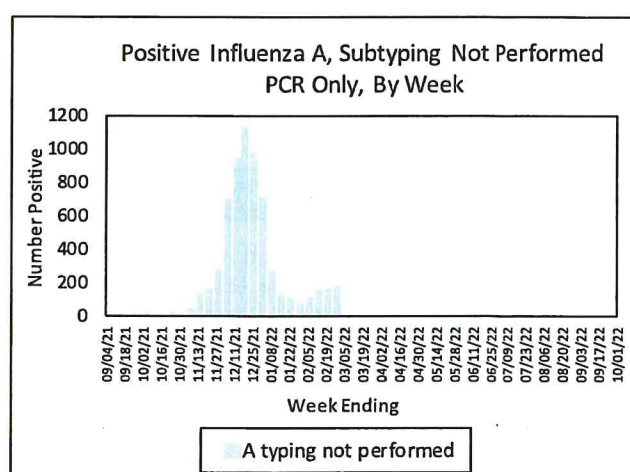

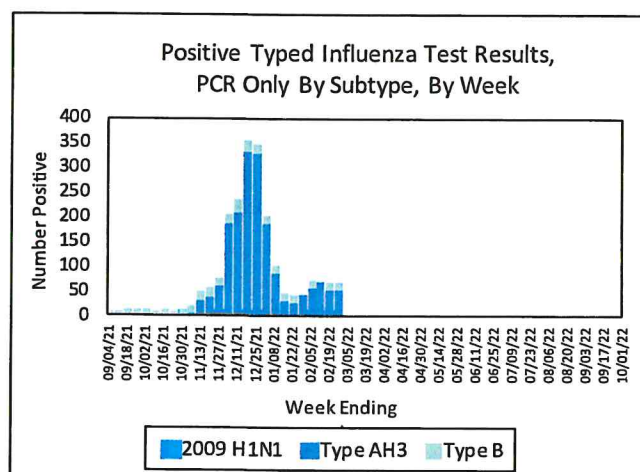

Pediatric flu deaths (confirmed)

2. Laboratory Testing

Real-time polymerase chain reaction (PCR) results for influenza (AH1N1, AH3N2, A subtyping not performed, and B) are obtained from electronic laboratory transmission submitted by acute care, commercial and public health laboratories. Rapid influenza test data are acquired from facilities reporting via the CDRSS Surveillance for Influenza and COVID-19 (SIC) module. While the cumulative totals begin with MMWR week 40, week ending October 9, 2021, the data represented in charts begin with MMWR week 35, week ending September 4, 2021. Past 3 weeks data includes the current week and two prior weeks starting with MMWR week 40, week ending October 9, 2021.

	Test Type	Current Week	Past 3 Weeks	Cumulative Total
PCR	Influenza A (H1N1)pdm09	0	3	12 (0.15%)
	Influenza A H3N2	29	181	1897 (23.07%)
	Influenza A (Subtyping Not Performed)	170	465	6207 (75.49%)
	Influenza B	2	6	106 (1.29%)
Rapid	Rapid Influenza	32	88	1341

3. Virologic Surveillance

3. Virologic Surveillance, continued

Data presented for rapid influenza testing represents information for the week prior to the current report week. Three year seasonal averages for rapid influenza tests are determined by calculating the average percent positive for each influenza season (October to May) beginning with the 2010-2011 season. These averages were ranked and the three highest and lowest overall season averages were selected. The three highest and lowest numbers were then averaged to obtain a single high and single low value for each week. The seasons which contribute to the high and low value for the rapid influenza chart are as follows: High: 16-17, 17-18, 18-19; Low: 10-11, 11-12, 14-15. Off season baseline is calculated by taking the average of percent positivity for a 10 year period (2010 through and including 2019) during the months when influenza is less likely to be circulating (May-August). Data from the 19-20, 20-21 seasons were excluded due to the COVID-19 pandemic.

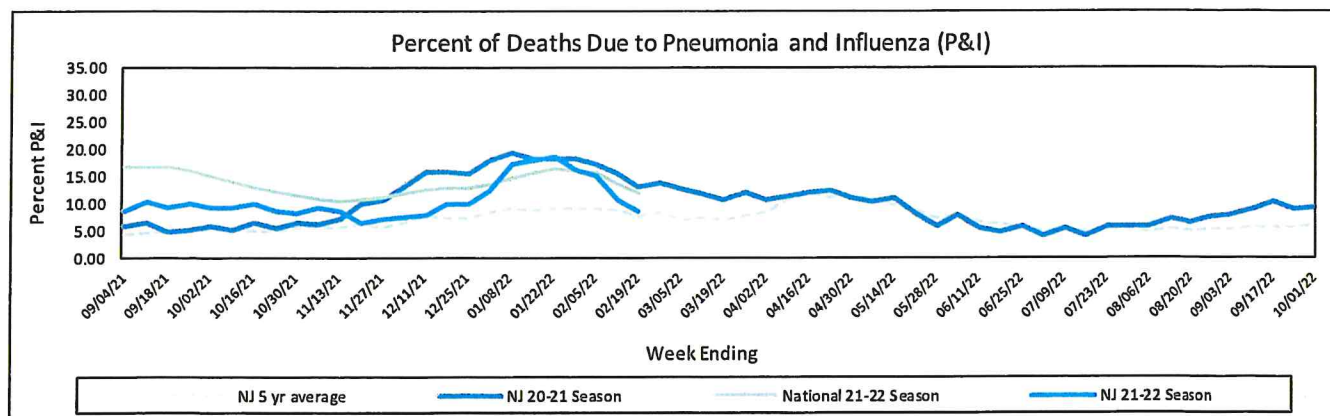

4. Pediatric Influenza Mortality

Influenza-associated pediatric mortality was added to New Jersey's reportable disease list in 2009. The below table includes severe and fatal influenza associated pediatric cases reported to NJDOH. Severe illness is defined as admission to an intensive care unit for an influenza-related illness. An influenza associated pediatric death is defined as a death resulting from a clinically compatible illness with lab confirmed influenza.

Influenza Season	US (fatal)	NJ (severe)	NJ (fatal)
2017-2018	180	61	5
2018-2019	106	51	6
2019-2020	188	57	2
2020-2021	1	1	0
2021-2022	6	8	0

5. Percent of Deaths due to Pneumonia and Influenza

Records of all deaths in New Jersey are maintained by NJDOH, Office of Vital Statistics and Registry and are submitted to the National Center for Health Statistics (NCHS). Pneumonia and influenza (P&I) deaths are identified from these records, compiled by the week of death and percentages are calculated. There is a 2-4 week lag period between the week the deaths have occurred and when the data for that week is reported. Because many influenza and COVID-19 deaths have pneumonia included on the death certificate, P&I no longer measures the impact of influenza in the same way as in the past. Additional information is also available at <https://gis.cdc.gov/grasp/fluview/mortality.html>.

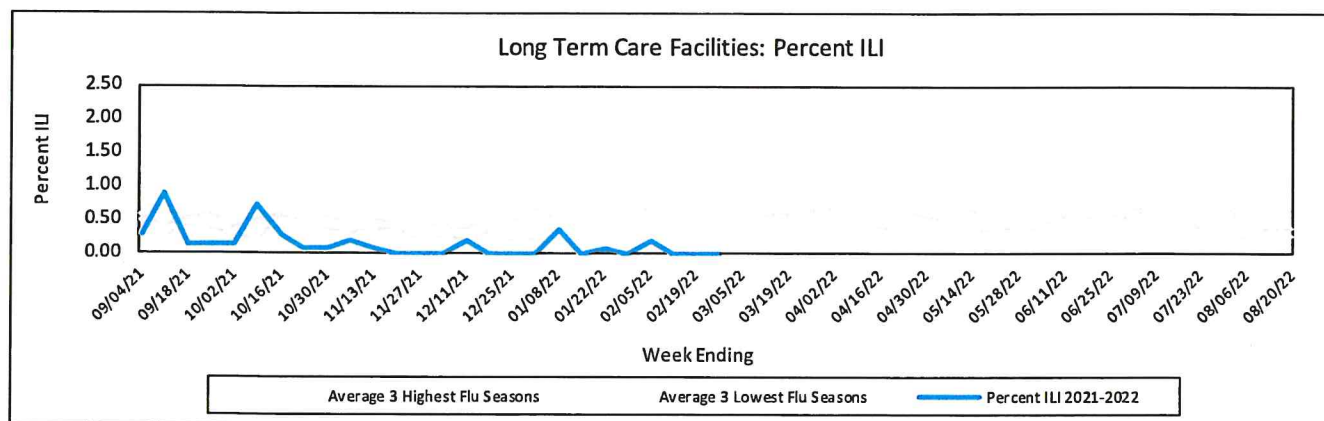

6. ILI Activity

Influenza-like illness (ILI) is defined as fever ($> 100^{\circ}\text{F}$ [37.8°C], oral or equivalent) and cough and/or sore throat. For long term care facilities, fever is defined as 2°F above baseline temperature. ILI Activity from long term care facilities (LTCFs) and absenteeism data from schools is collected in the SIC Module of the Communicable Disease Reporting and Surveillance System (CDRSS). LTCFs and schools report their total census and number ill with ILI or number absent, respectively. Emergency department (ED) data is aggregate weekly totals of syndromic ILI visits and total ED registrations as recorded in EpiCenter (e.g., NJDOH syndromic surveillance system). Off season baseline is calculated by taking the average of statewide percentages of ILI for a 10 year period (2010 through and including 2019) during months when influenza is less likely to be circulating (May-August). Data from the 19-20, 20-21 seasons were excluded due to the COVID-19 pandemic.

Percent Influenza-like Illness/Absenteeism				Baselines
	Current Week (range by county)	Last week Current year	Current week Last year	Off Season (Seasonal Average– low, high)
Long Term Care Facilities	0.00 (0.00, 0.00)	0.00	0.00	0.47 (0.42, 0.76)
Emergency Departments	2.18 (0.92, 3.39)	2.15	2.05	1.96 (3.16, 4.33)
Schools (Absenteeism)	5.01 (3.28, 8.63)	5.04	4.00	3.25 (4.30, 4.94)

6a. Long Term Care ILI Activity

6b. Long Term Care Outbreaks

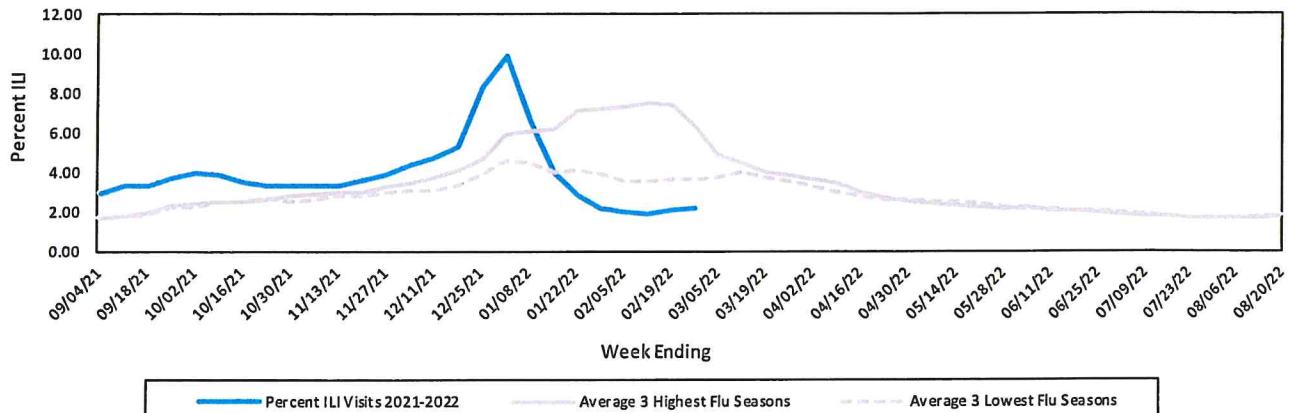

Only LTCF respiratory virus outbreaks reported to NJDOH that receive an outbreak number are recorded in this report. This does not include outbreaks due to COVID-19.

Respiratory Outbreaks in Long Term Care Facilities	
Cumulative Outbreaks 2021-2022 Season	12
No. outbreaks last 3 weeks	0
Regions with recent outbreaks	N/A

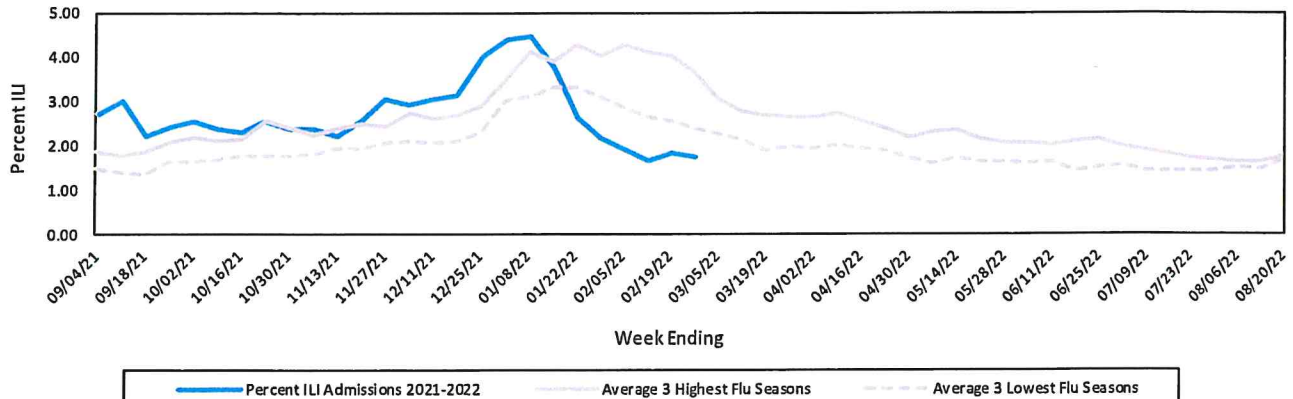

6c. Emergency Department ILI Activity (Syndromic Surveillance)

Daily visits and admissions associated with Influenza-like Illness (ILI) from emergency department data is collected via EpiCenter (NJDOH syndromic surveillance). Prior to 2017-2018 season, data on ILI visits were only recorded on one day per week usually on Tuesday. Beginning in the 2017-2018 season, weekly aggregate data is being recorded for ILI visits and admissions. Three year seasonal averages for emergency department visits and admissions are determined by calculating the average percent positive for each influenza season (October to May) beginning with the 2011-2012 season. These averages were ranked and the three highest and lowest overall season averages were selected. The three highest and lowest numbers were then averaged to obtain a single high and single low value for each week. The seasons which contribute to the high and low value for Emergency Department Visits chart are as follows: High: 12-13, 17-18, 18-19; Low: 11-12, 14-15, 15-16. The seasons which contribute to the high and low value for Emergency Department Admissions chart are as follows: High: 13-14, 14-15, 17-18; Low: 11-12, 12-13, 16-17. Data from the 19-20, 20-21 seasons were excluded due to the COVID-19 pandemic. Syndromic surveillance may capture other respiratory pathogens, such as SARS-CoV-2, that present with similar symptoms.

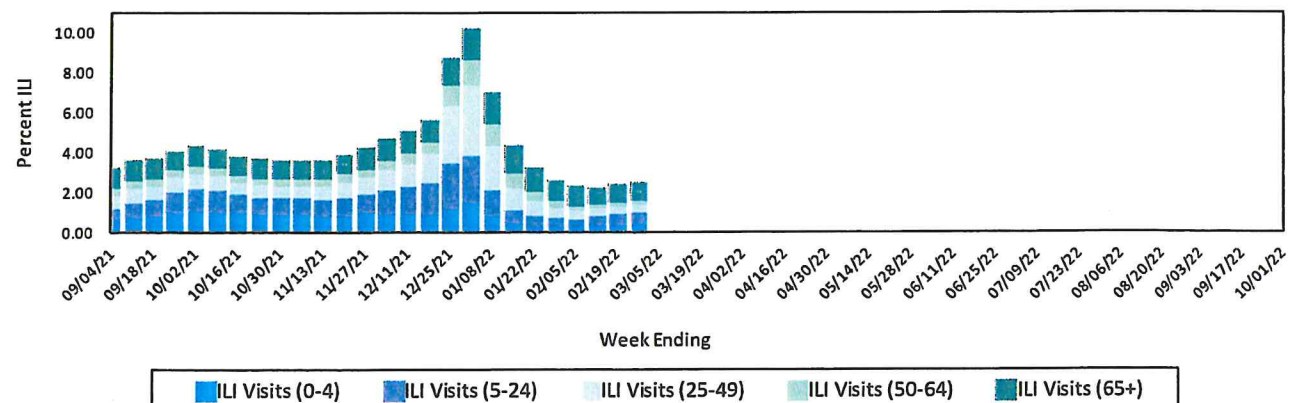

Percent of Emergency Department Visits (Syndromic) Associated with ILI

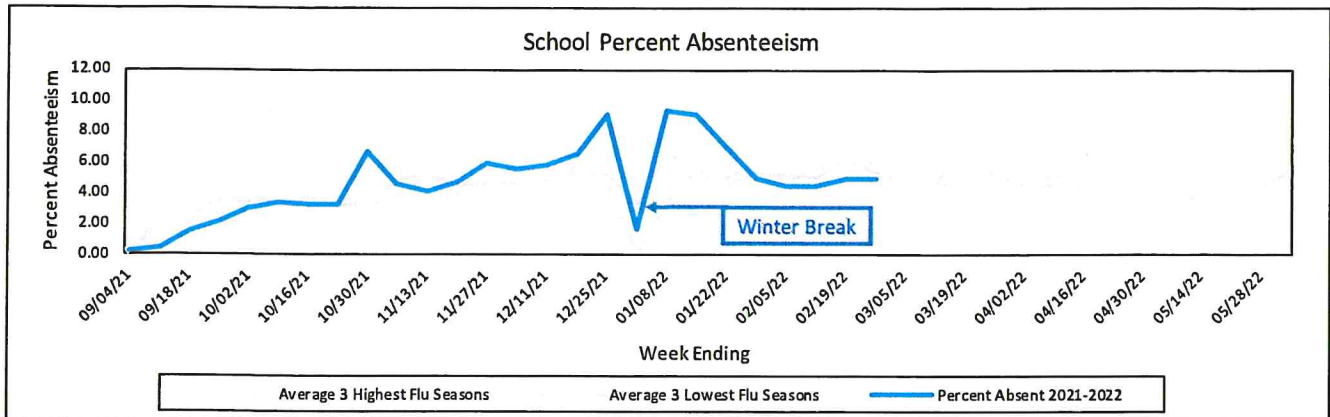

Percent of Emergency Department Visits (Syndromic) Associated with ILI that Resulted in Admission

Percent of Emergency Department Visits Associated with ILI by Age Group

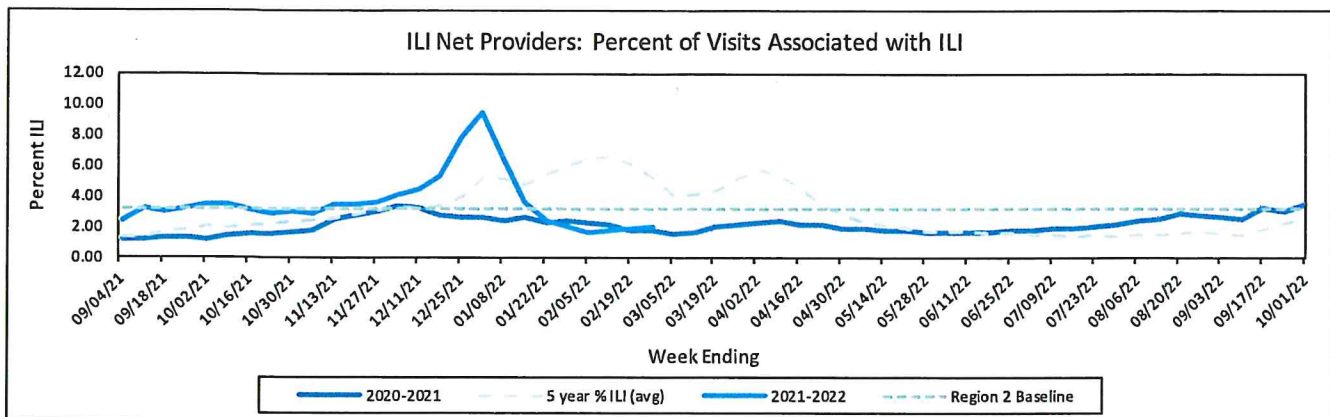

6d. School Absenteeism

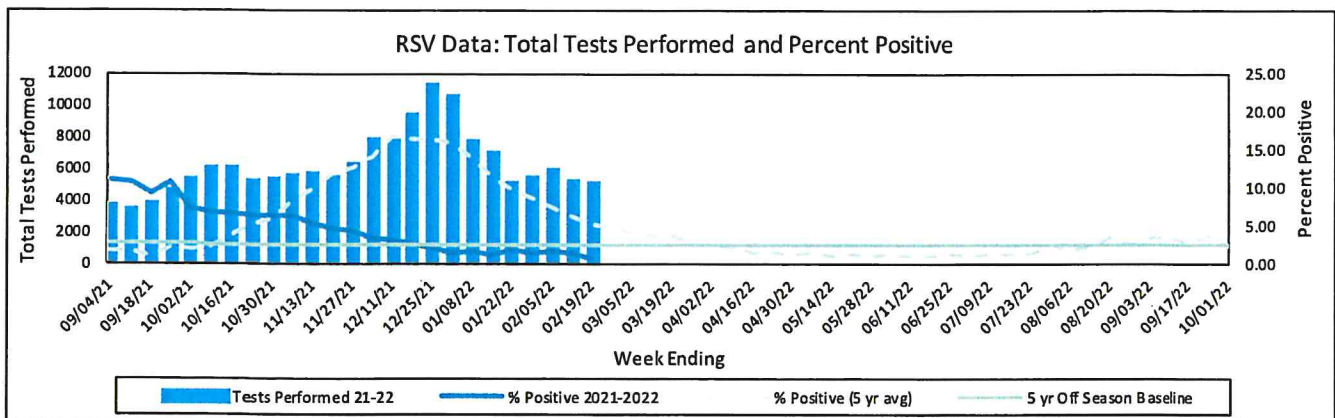

7. ILI Net Providers

The U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) monitors outpatient visits for influenza-like illness (ILI), not laboratory-confirmed influenza, and may capture visits due to other respiratory pathogens, such as SARS-CoV-2, that present with similar symptoms.

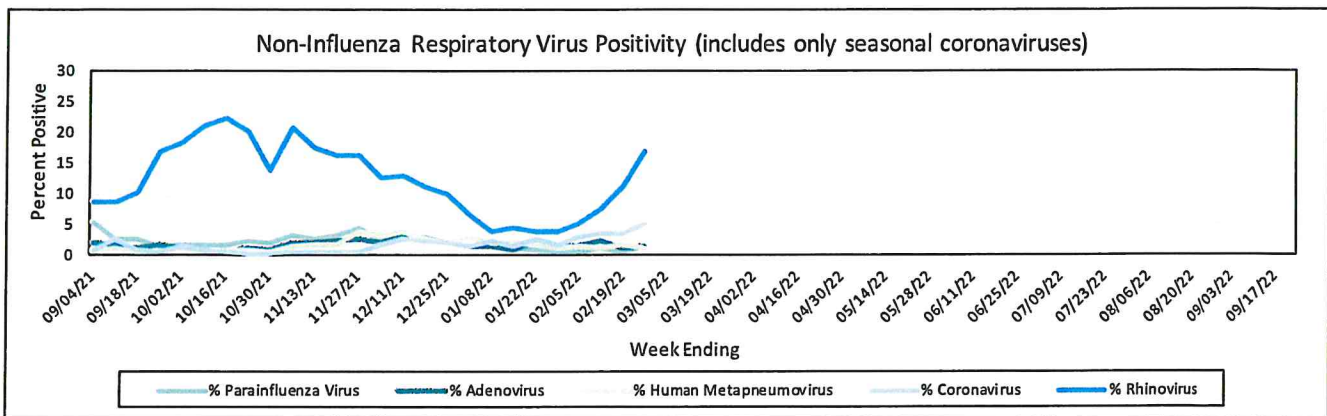

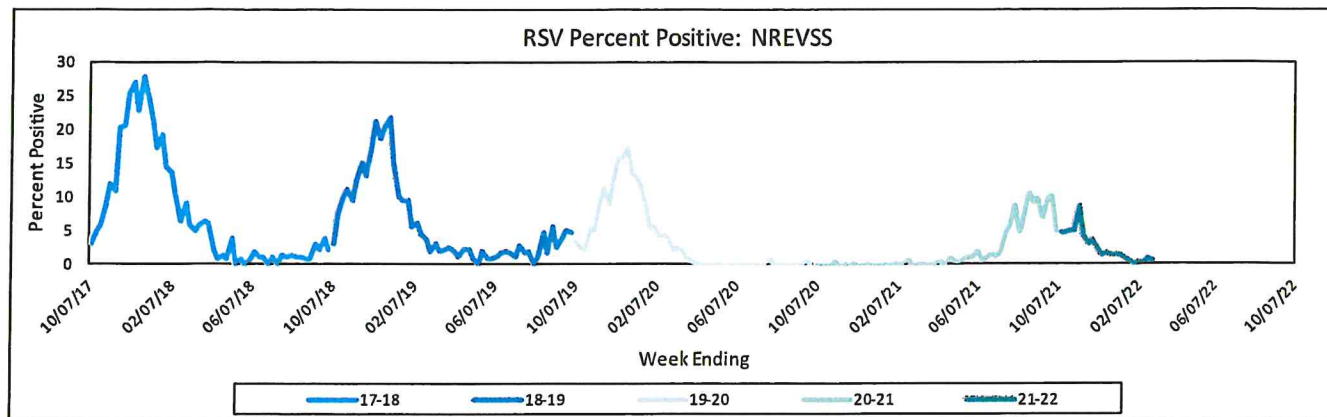

8. Non-Influenza Viral Respiratory Surveillance

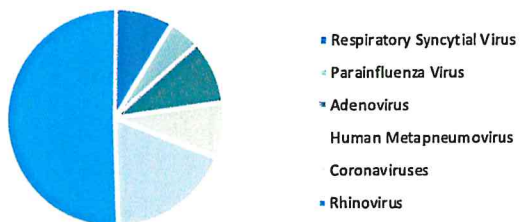

The National Respiratory and Enteric Virus Surveillance System (NREVSS) is a laboratory-based surveillance system and participating laboratories report the total number of tests performed and the total positive for a number of non-influenza respiratory viruses. Information about the CDC NREVSS system can be found at: <https://www.cdc.gov/surveillance/nrevss/labs/index.html>. Respiratory syncytial virus data are acquired from facilities reporting via the National Respiratory and Enteric Virus Surveillance System (NREVSS) or CDRSS ILI module. The RSV season is based upon the 5-year average of percent positivity and runs from the two consecutive weeks where percent positivity is at or above 10% through two consecutive weeks where it is below 10%. Off season for this report is determined to be week 7-45 (February through November) and the baseline is determined by averaging the percent positivity from the 5 year average during those weeks.

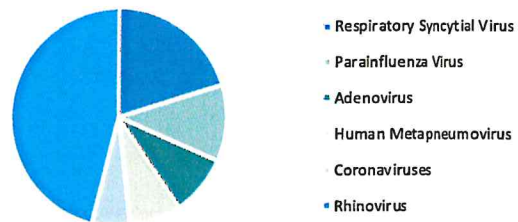

8. Non-Influenza Viral Respiratory Surveillance (continued)

Non-Influenza Respiratory Virus: Number of Positive Results in the Past Three Weeks by Virus

Non-Influenza Respiratory Virus: Number of Positive Results Cumulative to Date by Virus

Influenza Activity Level—Definitions for Public Health Regions

NJ Level	Definition		
	ILI Activity/Outbreaks		Lab Activity
Low	Low ILI activity detected OR one lab confirmed outbreak anywhere in the region	AND	Sporadic isolation of laboratory confirmed influenza anywhere in the region
Moderate	Increased ILI activity in less than half of the counties in the region OR two lab confirmed outbreaks in the public health region	AND	Recent (within 3 weeks) laboratory activity in the same counties of the region with increased ILI
High	Increased ILI activity in more than half of the counties in the region OR ≥ 3 lab confirmed outbreaks in the region	AND	Recent (within 3 weeks) laboratory activity in more than half of the counties in the region with increased ILI
